Manager and Propane Vehicle Specialist Celebrates 10-Year Anniversary with Delta Liquid Energy

Propane fueled company vehicles, school buses and ag engines
are at the forefront of his specialty

PASO ROBLES, CA (April 22, 2007) – Delta Liquid Energy is pleased to announce the 10-year anniversary of Shane Hunt, Fleet Management Division Manager. Hunt oversees the regular maintenance schedules of the entire DLE fleet, of which more than 80% are propane-fueled. He makes himself available to DLE for after hour service calls and consults and advises the Ride-On Transportation mechanics on the proper maintenance procedures of six propane-fueled vans, Lucia Mar Unified School District on four propane fueled school buses, and numerous farmers on propane-fueled agricultural engines.

Richard Steck, Hunt's supervisor who relies on him on a day-to-day basis, said, “How time flies. Shane has been a valuable employee for the past 10 years. We hope that Shane remains with the company for many more years to come.”

Although Hunt is based out of the corporate headquarters in Paso Robles, he travels the expanse of DLE’s customer reach, which consists of nine locations from Paso Robles to Santa Paula on the coast, and Farmersville to Pomona inland.

Hunt brings a rare talent to DLE with eight years of propane vehicle service training. With certifications that are too many to mention, Hunt is an extremely valued employee. Last year, DLE sent Hunt to Holland to train in maintenance procedures for the Ford 5.4-liter propane-fueled engines. “Propane motor fuel is a common in other countries. For example, at gas stations in Europe, it is called autogas,” Hunt explained.

Hunt and his wife, Beth, recently celebrated the birth of their first child, Bryce. “Luckily, I am good at multitasking,” Hunt said, laughing.

Delta Liquid Energy is a third-generation, family-owned and operated business headquartered in Paso Robles, Calif. The company has been in business since 1936 and operates nine service facilities throughout California. For additional information on DLE, call (805) 239-0616 or visit the Web site at www.deltaliquidenergy.com.
