

Propane PRESS

Volume XX
Spring 2001

The entire staff of Delta Liquid Energy would like to take this opportunity to thank you for your business. If there is anything we can do to be of service, please feel free to give us a call.

*“Family Owned
and Operated
Since 1936”*

A significant rise in crude oil and natural gas prices during 2000 / 2001 was a major factor that contributed to the increase of home heating bills this past winter.

Enjoy the benefits of having a stable, reliable, and known cost of propane next winter with our “Pre-Buy” program.

“The Solution to Reducing Large Winter Bills.”

The **Pre-Buy program** insures that participating Delta Liquid Energy customers are protected from higher prices in winter. In the event propane prices are lower than your contract price, we credit you with the difference.

To place your order for **Pre-Buy propane**, just give your local Delta Liquid Energy office a call.  All of our phone numbers are listed on the other side of this newsletter. Or, just complete the attached **Pre-Buy Coupon** below and mail it to your local Delta Liquid Energy office.

Pre-Buy purchases must be paid for in full on or before August 1, 2001. An optional monthly payment plan is available for an additional \$25.00 payment plan fee. Monthly payments to begin on June 1, 2001. **Pre-Buy propane deliveries will begin on or after October 1, 2001.**

PROPANE
EXCEPTIONAL ENERGY™

Limited Time Offer !

Name _____

I am interested in pre-purchasing _____ gallons.

Available in 50 gallon increments • Some restrictions may apply • Limited quantities available

WE GLADLY ACCEPT

“Visit Us At Our Website”
www.deltaliquidenergy.com

To comply with Proposition 65, the Safe Drinking Water and Toxic Enforcement Act of 1986, we are obliged to issue the following warning:

PROPANE contains chemicals known to the State of California to cause cancer or reproductive harm. State law requires us to warn you of the presence of these chemicals. Benzene, soot and formaldehyde are such chemicals. A trace amount of benzene may occur in propane, but will normally be consumed during combustion. Exposure through leaking gas is possible. Soot and formaldehyde, by products of burning gas, are minimized by proper combustion. Delta Liquid Energy encourages all of its customers to use propane safely. You should read and follow all use, care, and manufacturer instructions for propane appliances and equipment. Proper ventilation and frequent inspection of propane appliances and equipment are highly recommended.

Our service technicians are available to check and adjust your propane gas appliances. A warning odor is added to propane so that leaks of unburned gas can be quickly detected. If a gas odor is detected, call us immediately.

SAFETY TIP

Did you know that the average **gas grill cylinder** is designed to contain *only 20 lbs. of propane?* Propane weighs approximately 4.2 lbs. per gallon.

It is important to know that when an empty gas grill bottle is properly filled, *it should be limited to 4.7 gallons.* Even though most people refer to this size cylinder as a five gallon tank, make sure your propane supplier **never overfills your propane cylinder.**
